Natural computing - Wikipedia Nature-inspired models of computation The most established "classical" nature-inspired models of computation are cellular automata, neural computation, and evolutionary computation. More recent computational systems abstracted from natural processes include swarm intelligence, artificial immune systems, membrane computing, and amorphous computing. » Nature Inspired Computing - World Of Computing Nature Inspired Computing (NIC) is one that aims to develop new computing techniques after getting ideas by observing how nature behaves in various situations to solve complex problems. Research on NIC has opened new branches such as evolutionary computation , neural networks, artificial immune systems, swarm intelligence , and so on. Bio-inspired computing - Wikipedia Bio-inspired computing, short for biologically inspired computing, is a field of study that loosely knits together subfields related to the topics of connectionism, social behaviour and emergence. It is often closely related to the field of artificial intelligence , as many of its pursuits can be linked to machine learning.
